

Woven bar code labels

STRICO's woven bar code labels can be designed to your creativity without reducing the readability of the bar code.

We are able to weave the labels with colors on the size you require. It is possible to combine bar- or 2D codes with color codes used against plagiarism.

Application	Permanent identification of garments, linen and many other fabric items
Material	Polyester threads Image: Woven image Colors: Standard black on white Option: Different colors available Surface: Matte Adhesive: Heat seal adhesive (option)
Size	The labels are produced as per your specifications
Bar code	2/5 interleaved, Code 128, Code 39, Datamatrix ECC-200
Attaching	- sewing on with tear-proof thread (preferred method) - patching with heat seal adhesive (option)
Temperature resistance	- 40°C ... +120°C (cleaning- and finishing-processes) Tunnel finisher up to 180°C
Chemical durability	Resistant to commonly used cleaning agents. No change after 100 cycles: Washing at 95°C / pH 11, disinfection and bleaching
Mechanical durability	Centrifugation, pressing or mangling

We recommend to test the labels in the real environment prior to an order.
